

PAPUA NEW GUINEA NATIONAL DEPARTMENT OF HEALTH

PNG Nursing Council and Medical Board Online Regulatory Workforce Platform

Documentation Index

Guide to the current documentation set, operational references, technical files, key screens, and launch checks.

Generated: 1 June 2026

Documentation Index

Documentation Index

Project: PNG Nursing Council and Medical Board Online Regulatory Workforce Platform

Last updated: 1 June 2026

Start Here

- README.md - Project overview, setup notes, and developer quick start.
- docs/FULL_PLATFORM_USER_GUIDE_20260601.md - Current role-based user guide covering dashboards, analytics snapshots, ICMS complaints, discipline, decisions, documents, NHWA, maps, forums, FAQs, receipts, and staff workflows.
- docs/PLATFORM_UPDATE_BRIEF_20260601.md - Current update brief, now extended with the Nursing Council snapshot, Catherine workbook refresh, receipt linking, ICMS, discipline, decision register, NHWA, and mapping functions.
- docs/DATA_EXTRACTION_AND_POPULATION_GUIDE.md - Current data-quality position, cleansing workflow, analytics snapshot import, Catherine workbook alignment, receipt-owner linking, and safe data-flow standard.
- docs/OPENKM_Comparison_And_Roadmap.md - OpenKM-style document and records management guide for the completed platform.
- docs/LOCAL_MOBILE_INTEGRATED_TESTING.md - Local Django-to-Android integrated testing guide covering emulator URLs, phone URLs, firewall, adb reverse, mobile API smoke endpoints, and safety rules.
- docs/ANDROID_NURSING_COUNCIL_FORMS_IMPLEMENTATION_BRIEF.md - Android coding-agent brief for implementing the Nursing Council mobile form pack, full field capture, attachments, sync payloads, and acceptance checks.
- docs/OPENKM_Project_Timeline.md - Completed OpenKM-style project timeline and post-launch governance plan.
- docs/government_launch_package/README.md - Government-grade enterprise architecture, security, data governance, workflow, QA, deployment, and support launch package.
- docs/government_launch_package/14_ai_staff_assistant_and_import_cleansing.md - Staff AI Assistant, optional OpenAI mode, optional private offline GPT mode, and safe import-cleansing guide.
- docs/government_launch_package/15_free_local_gpt_setup.md - Free local GPT setup using Ollama or approved internal model servers.
- docs/presentation/NDOH_Regulatory_Platform_Presentation_Pack_20260601.pdf - Presentation-ready PDF pack with live statistics, diagrams, workflows, and refreshed interface screenshots.
- docs/presentation/NDOH_Regulatory_Platform_Presentation_Brief_20260601.docx - Editable Word version of the presentation brief.
- docs/presentation/NDOH_Regulatory_Platform_Documentation_Index_20260601.pdf - PDF index for the presentation document pack.
- docs/NDOH_Full_Scope_Platform_User_Guide_20260601.pdf - PDF handover guide for all staff roles and full platform functions.
- docs/NDOH_Documentation_Index_20260601.pdf - PDF documentation index and launch reference pack.
- docs/NDOH_Regulatory_Bodies_Online_Workforce_System_Brief_Minister_Updated.docx - Updated Minister briefing document generated from the current live database.
- docs/NDOH_Regulatory_Bodies_Online_Workforce_System_Brief.docx - Updated system briefing document for user management and platform capability.
- docs/PNG_Nursing_Council_Regulatory_Alignment_Report.docx - Updated Nursing Council regulatory alignment and database comparison report.
- docs/NDOH_Government_Launch_Package_20260601.pdf - Full PDF bundle of the government launch package documentation.

Operational Guides

- docs/FULL_PLATFORM_USER_GUIDE_20260601.md - How to log in, what each role can access, what each role cannot access, and how staff use analytics, ICMS, discipline, decisions, documents, NHWA, maps, forums, FAQs, and receipt linking.
- docs/PLATFORM_UPDATE_BRIEF_20260601.md - Quick operational briefing for the newest interface and workflow changes.
- docs/DATA_EXTRACTION_AND_POPULATION_GUIDE.md - How to align paper records, spreadsheets, analytics snapshots, ATP data, N-DATA, receipts, facilities, institutions, qualifications, and practitioner records before publishing statistics.
- docs/OPENKM_Comparison_And_Roadmap.md - How the repository, metadata, OCR text, duplicate document checks, document versions, approval sign-off, audit events, and office-scoped access work.
- docs/presentation/README.md - Presentation pack folder guide with generated PDFs, Word brief, Markdown source, screenshots, and diagrams.
- docs/PHASE1_PHASE2_TEST_GUIDE.md - Earlier phase testing guide for workflow, reports, and staff tools.
- docs/LOCAL_MOBILE_INTEGRATED_TESTING.md - How to run local integrated desktop/backend and Android emulator/phone testing.
- docs/ANDROID_NURSING_COUNCIL_FORMS_IMPLEMENTATION_BRIEF.md - Nursing Council Android form implementation instructions for the mobile coding agent.
- DEPLOYMENT_CHECKLIST.md - Deployment and handover checklist.
- docs/status/SYSTEM_STATUS_REPORT.md - Current system status report.
- docs/status/PROJECT_COMPLETION_REPORT.md - Completion report for management handover.

Government Launch Package

- docs/government_launch_package/01_system_requirements.md - Formal system requirements and acceptance criteria.
- docs/government_launch_package/02_technical_architecture.md - Enterprise architecture diagrams covering users, database, repository, reporting, AI, email, backup, and government hosting.
- docs/government_launch_package/03_data_governance_and_dictionary.md - Data governance rule and data dictionary for registry, licence, ATP, receipt, source, institution, facility, and employment fields.
- docs/government_launch_package/04_security_privacy_controls_matrix.md - NIST/OWASP/PNG Digital Government-aligned controls matrix.
- docs/government_launch_package/05_role_access_matrix.md - Role access and privacy matrix for all major user groups.
- docs/government_launch_package/06_workflow_engine_spec.md - Structured regulatory workflow engine specification.
- docs/government_launch_package/07_document_records_management_sop.md - OpenKM-style repository SOP for official records.
- docs/government_launch_package/08_testing_qa_uat_checklist.md - Automated testing, role testing, security testing, and UAT checklist.
- docs/government_launch_package/09_deployment_backup_support_plan.md - Deployment, backup, restore, monitoring, and support plan.
- docs/government_launch_package/10_staff_training_guide.md - Staff training guide by role.
- docs/government_launch_package/11_maintenance_sla_change_request.md - Maintenance, SLA, and change request model.
- docs/government_launch_package/12_gap_register_and_modular_roadmap.md - Launch gate gap register and modular enterprise roadmap.
- docs/government_launch_package/13_enterprise_ui_design_standard.md - Government-grade enterprise UI design standard.

- docs/government_launch_package/14_ai_staff_assistant_and_import_cleansing.md - AI provider modes, privacy rules, local/offline operation, optional OpenAI use, optional private model server use, and import cleansing preview.
- docs/government_launch_package/15_free_local_gpt_setup.md - Free local GPT setup, Ollama configuration, health checks, and offline AI security rules.

Technical References

- apps/dashboard/access.py - Central role and office-scope checks for Nursing Council, Medical Board, finance, reviewer, and staff dashboards.
- apps/accounts/models.py - User roles, office scope, operational approval flags, and operational access request records.
- apps/accounts/security.py - Staff MFA and security audit helper functions.
- apps/workforce/services/nursing_council_workflows.py - Nursing Council pathway, form, checklist, fee, declaration, validation, approval, public register, supervisor, employer, and deceased workflow service.
- apps/documents/models.py - OpenKM-style document repository models: folders, documents, versions, metadata, access policies, and audit events.
- apps/complaints/models.py - Formal ICMS complaint cases, disciplinary cases, attachments, events, and regulatory decision records.
- apps/dashboard/nursing_analytics.py - Nursing Council active analytics snapshot summary and drilldown payloads.
- apps/dashboard/nursing_analytics_import.py - Cleansed workbook snapshot import service.
- apps/dashboard/nursing_catherine_breakdown.py - Catherine provisional/full-licence and cadre workbook alignment service.
- apps/dashboard/receipt_linking.py - Receipt owner matching and high-value review routing.
- apps/dashboard/nhwa_toolkit.py - NHWA workbook alignment centre helpers.
- apps/documents/access.py - Repository access rules for System Admin, registrars, approved reviewers, data-quality staff, and finance restrictions.
- apps/documents/forms.py - Staff-facing repository upload, metadata, linked-record, and version forms.
- apps/documents/views.py - Repository search, upload, detail, metadata update, version upload, OCR/search support, and audited download views.
- docs/generate_platform_user_guide_pdfs.py - Rebuilds the full-scope platform user guide PDF and documentation index PDF.
- docs/generate_presentation_package.py - Generates the presentation-ready documentation pack, diagrams, screenshots, Word brief, and PDFs from current live data.
- apps/dashboard/views.py - Dashboards, finance reports, monthly analytics exports, AI staff assistant entry points, and staff operations.
- apps/dashboard/ai_provider.py - AI provider abstraction for local rules, optional OpenAI, and optional private offline model servers.
- apps/workforce/services/ai_import_cleanser.py - Safe import-cleansing preview service that normalises rows and flags human-review issues before live promotion.
- apps/dashboard/management/commands/ai_model_status.py - Checks the current AI mode and verifies local Ollama model availability.
- apps/accounts/management/commands/reset_platform_users.py - Safe account reset command that preserves captured registry data.
- apps/documents/management/commands/bootstrap_document_repository.py - Seeds root repository folders for General Registry, Nursing Council, and Medical Board.
- apps/workforce/management/commands/bootstrap_nursing_council_workflows.py - Seeds Nursing Council workflow configuration.
- apps/workforce/management/commands/import_atp_workbook.py - Imports current Authority To Practice workbook data.

- `apps/workforce/management/commands/import_ndata_workbook.py` - Imports Nursing Council N-DATA workbook data.
- `apps/workforce/management/commands/import_medical_board_workbook.py` - Imports Medical Board data into the Medical Board scope only.
- `apps/workforce/management/commands/audit_missing_data.py` - Audits missing fields for cleansing review.
- `apps/workforce/management/commands/audit_duplicate_records.py` - Audits duplicate practitioner candidates.
- `apps/mobile_intake/management/commands/local_mobile_test_setup.py` - Prints local Android emulator/phone backend URLs, firewall hints, and mobile API health status for integrated testing.
- `apps/dashboard/management/commands/import_nursing_analytics_snapshot.py` - Imports and activates the cleansed Nursing Council analytics workbook.
- `apps/dashboard/management/commands/import_nursing_catherine_licence_breakdown.py` - Imports the Catherine provisional/full-licence and cadre workbooks into the analytics layer without clashing with legal registry records.
- `apps/dashboard/management/commands/link_receipts_to_individual_records.py` - Links receipts to owner records where evidence is strong and sends unmatched receipts to high-value review.
- `apps/dashboard/management/commands/geocode_mapped_entities.py` - Stores verified Google Maps coordinates locally for mapped schools, institutions, and facilities.

Key Screens

- `/dashboard/` - Main role-based dashboard redirect.
- `/dashboard/nursing-council/` - Nursing Council registrar operations, ATP analytics, live statistics, reports, workflow tools, and data-quality tools.
- `/dashboard/medical-board/` - Medical Board workspace and Medical Board-specific statistics.
- `/dashboard/reports/financial/?office=nursing` - Nursing Council financial forecast and receipt tracking.
- `/dashboard/reports/financial/?office=medical` - Medical Board financial forecast and receipt tracking.
- `/dashboard/complaints/` - Formal ICMS complaint and incident register.
- `/dashboard/complaints/discipline/` - Disciplinary case register.
- `/dashboard/complaints/decisions/` - Formal regulatory decision register.
- `/dashboard/public/faqs/` - Public FAQ page.
- `/dashboard/public/forum/` - Moderated forum entry point.
- `/dashboard/public/map/` - Mapped schools, institutions, and facilities using stored coordinates.
- `/dashboard/nhwa-workbooks/` - NHWA web workbook and reporting layer.
- `/dashboard/duplicate-reviews/` - Duplicate Review Queue with search, sorting, page-length controls, full pagination, grouped source rows, and review actions.
- `/documents/search/` - OpenKM-style repository search for authorised staff.
- `/workforce/nursing/workflow-tools/` - Employer verification and deceased practitioner workflow tools.
- `/nursing/forms/` - Public Nursing Council form and pathway selection.
- `/public/nursing-council/register/search/` - Safe public Nursing Council register search endpoint.
- `/notifications/communications/` - Staff inbox, chat, notification history, enquiries, read/opened message status, and operational access requests.
- `/records/` - Workforce Records Hub for authorised staff.
- `/records/nursingprofessional/` - Nursing Professionals registrar table with search, sorting, pagination, view/edit, and add-new actions where authorised.
- `/admin/` - Secure Administration Console for System Admin only.

Current Database Snapshot

Live snapshot checked on 1 June 2026. Nursing Council analytics figures are from the active cleansed workbook snapshot; operational table counts remain separate.

- Nursing Council active analytics lifecycle records: 34,851
- Clean ATP records: 19,998
- Clean provisional records: 8,158
- Clean full-licence records: 6,695
- Data quality health score: 87.0%
- Estimated practitioner match groups: 22,765
- Registered Nurses / Midwives / Nurse Aides / Health Students in live person tables: 0
- Community Health Workers: 11,594
- Medical Doctors: 327
- Applications: 0
- Imported licence/history rows: 53,178
- Receipts: 11,501
- Receipt amount recorded: PGK 822,882.30
- Missing-data review items: 57,129
- Duplicate-review items: 177
- Pending duplicate-review items: 177
- Qualification records: 11,863
- Professional document uploads: 0 legacy uploads currently attached
- Repository folders: 24
- Repository documents: 0 current repository files
- Mapped entity references: 1,462
- Geocoded mapped entities: 0
- Public FAQ entries: 5
- Formal ICMS complaint cases: 0
- Disciplinary cases: 0
- Regulatory decision records: 0

Maintenance Commands

```
.\.venv\Scripts\python.exe manage.py check
.\.venv\Scripts\python.exe manage.py migrate
.\.venv\Scripts\python.exe manage.py bootstrap_document_repository
.\.venv\Scripts\python.exe manage.py bootstrap_nursing_council_workflows
.\.venv\Scripts\python.exe manage.py bootstrap_nhwa_workbooks
.\.venv\Scripts\python.exe manage.py seed_engagement_platform
.\.venv\Scripts\python.exe manage.py import_nursing_analytics_snapshot --path
"path\to\PNG_Nursing_Council_Integrated_Dashboard_Model.xlsx" --activate
.\.venv\Scripts\python.exe manage.py import_nursing_catherine_licence_breakdown --licence-path
"path\to\PNG_Nursing_Council_Cleaned_Licence_Breakdown.xlsx" --cadre-path
"path\to\PNG_Nursing_Council_Cadre_Breakdown.xlsx"
.\.venv\Scripts\python.exe manage.py link_receipts_to_individual_records --review-unmatched
.\.venv\Scripts\python.exe manage.py geocode_mapped_entities --limit 100
.\.venv\Scripts\python.exe manage.py audit_missing_data --audit-import-rows --latest-batch
.\.venv\Scripts\python.exe manage.py audit_duplicate_records
.\.venv\Scripts\python.exe manage.py ai_model_status
.\.venv\Scripts\python.exe manage.py ai_cleansse_import_preview --file path\to\data.xlsx --rows 25
```

```
--scope nursing
.\.venv\Scripts\python.exe manage.py prepare_production_data --write-report
.\.venv\Scripts\python.exe manage.py prepare_production_data --apply --skip-audit --write-report
.\.venv\Scripts\python.exe manage.py reset_platform_users --confirm
```

Security Rules

- Nursing Council and Medical Board records must stay separated through backend role and office-scope checks, not only by hidden menu links.
- Finance users can view financial forecast and workforce flow only; they cannot perform CRUD operations or routine registrar approvals.
- Reviewer-style users remain locked out of full Nursing Council or Medical Board operations until their operational access request is approved by the relevant registrar or System Admin.
- Notification and mailbox read status must clear unread badges after the user opens the relevant notification history or message thread.
- Public registration cadre choices must remain controlled dropdown values, including distinct CHW provisional and CHW full-license pathways.
- Public register responses must never expose date of birth, phone, email, address, passport, police clearance, medical report, transcript, receipt image, or internal notes.
- Public complaints and forum posts are moderated before publication or staff action.
- Public complaints, analytics snapshots, NHWA workbooks, and map references must not overwrite legal registry records automatically.
- Person_Group_Key is an analytics grouping key only.
- Receipt-owner matching must link only high-confidence matches; unmatched or suspicious receipts must be reviewed.
- /admin/ is reserved for System Admin only.
- Temporary testing passwords must be changed before production launch.
- AI Staff Assistant is a guidance tool only. It must not replace registrar review, payment verification, source evidence, audit logs, or official decision records.

Deployment Checklist

Deployment Checklist

Project: PNG Nursing Council and Medical Board Online Regulatory Workforce Platform

Last updated: 1 June 2026

1. Deployment Status

The platform foundation is ready for controlled operational use, subject to final production hosting, security, backup, password, and staff-training checks.

2. Pre-Deployment Technical Checks

- ☐ Confirm production database connection.
- ☐ Confirm `DEBUG=False`.
- ☐ Confirm production `ALLOWED_HOSTS`.
- ☐ Confirm HTTPS/SSL certificate.
- ☐ Confirm secure `SECRET_KEY` and environment variables.
- ☐ Confirm email backend for password reset.
- ☐ Confirm static file collection.
- ☐ Confirm media/document storage location.
- ☐ Confirm backup and restore process.
- ☐ Confirm server monitoring and log retention.
- ☐ Confirm NDOH ICT hosting approval.

3. Required Commands

Run before release:

```
.\.venv\Scripts\python.exe manage.py migrate
.\.venv\Scripts\python.exe manage.py bootstrap_reference_data
.\.venv\Scripts\python.exe manage.py bootstrap_document_repository
.\.venv\Scripts\python.exe manage.py bootstrap_nursing_council_workflows
.\.venv\Scripts\python.exe manage.py bootstrap_nhwa_workbooks
.\.venv\Scripts\python.exe manage.py seed_engagement_platform
.\.venv\Scripts\python.exe manage.py check
```

Run for data-quality readiness:

```
.\.venv\Scripts\python.exe manage.py audit_missing_data --audit-import-rows --latest-batch
.\.venv\Scripts\python.exe manage.py audit_duplicate_records
.\.venv\Scripts\python.exe manage.py link_receipts_to_individual_records --review-unmatched
```

Run for local Android integrated testing only:

```
.\.venv\Scripts\python.exe manage.py bootstrap_mobile_intake
.\.venv\Scripts\python.exe manage.py local_mobile_test_setup --check-api
.\.venv\Scripts\python.exe manage.py runserver 0.0.0.0:8000
```

Use `http://10.0.2.2:8000/` for the Android emulator and `http://YOUR-PC-IP:8000/` for a physical phone on the same Wi-Fi. This is for controlled local testing only, not production hosting.

4. Access and Security Checklist

- ☐ System Admin can access `/admin/`.
- ☐ Registrar users cannot access `/admin/` unless also System Admin.

- ☐ Nursing Council users cannot view Medical Board private data.
- ☐ Medical Board users cannot view Nursing Council private data.
- ☐ Finance Officer can view Workforce Flow.
- ☐ Finance Officer can view Nursing Council finance separately.
- ☐ Finance Officer can view Medical Board finance separately.
- ☐ Finance Officer cannot use CRUD, registrar approvals, imports, or admin backend.
- ☐ Reviewer users cannot access full operations until approved.
- ☐ Operational access request appears in Staff Inbox & Chat.
- ☐ Registrar/System Admin can approve or reject operational access request.
- ☐ Public register search returns safe fields only.
- ☐ Forgotten-password flow sends email successfully.
- ☐ Sign-in button text remains visible against the portal background.
- ☐ Notification bell unread count appears when messages/notifications are sent.
- ☐ Notification bell unread count clears after the user opens notification history or the related message thread.
- ☐ Registrar opening an inbox thread marks the sender's sent/inbox status as opened/read.
- ☐ Registrar and System Admin users can view notification history.
- ☐ Nursing Council staff can open `/dashboard/complaints/`, `/dashboard/complaints/discipline/`, and `/dashboard/complaints/decisions/`.
- ☐ Medical Board-only users cannot access Nursing Council complaint or analytics data unless authorised.
- ☐ Public users can open `/dashboard/complaints/submit/` without private staff access.
- ☐ Public forum posts and public complaint submissions are moderated before publication or staff action.
- ☐ Public map and FAQ pages do not expose private practitioner data.
- ☐ Test passwords are changed before production launch.

5. Dashboard Smoke Tests

- ☐ `/dashboard/` redirects correctly by role.
- ☐ `/dashboard/nursing-council/` loads for Nursing Council Registrar.
- ☐ `/dashboard/medical-board/` loads for Medical Board Registrar.
- ☐ `/dashboard/reports/financial/?office=nursing` loads and shows Nursing Council figures only.
- ☐ `/dashboard/reports/financial/?office=medical` loads and shows Medical Board figures only.
- ☐ `/dashboard/reports/financial/` loads for approved operations/data-quality reviewer roles where allowed by role and scope.
- ☐ `/dashboard/duplicate-reviews/` loads for authorised registrar/admin/data-quality users.
- ☐ Duplicate Review Queue shows search, sort, page length, full pagination, grouped source rows, and Mark Reviewed/Mark Merged/Reopen actions.
- ☐ `/documents/search/` loads for authorised staff.
- ☐ `/records/` loads for authorised staff.
- ☐ `/records/nursingprofessional/` shows registrar table functions: search, sort, pagination, View, Edit, and Add New where authorised.
- ☐ `/nursing/forms/` loads for public/applicant use.
- ☐ `/accounts/` registration shows the emblem background and controlled Role/Cadre dropdowns.

- ☐ Cadre dropdown distinguishes CHW provisional registration from CHW full license.
- ☐ /public/nursing-council/register/search/ returns public-safe output.
- ☐ /notifications/communications/ shows notifications, notification history, enquiries, folders, read/opened message status, and access requests.
- ☐ /dashboard/standards-alignment/ shows Standards and Compliance once without repeated header content.
- ☐ /api/mobile/v1/health/ returns status ok for local mobile integration testing.
- ☐ /api/mobile/v1/bootstrap/, /forms/, /lookups/, /submissions/status/, and /accounts/status/ are reachable from the Android emulator or phone after mobile login.
- ☐ /dashboard/mobile-intake/ receives synced mobile submissions for registrar review.
- ☐ /dashboard/nursing-council/analytics/summary/ returns the active Nursing Council snapshot summary.
- ☐ /dashboard/nursing-council/analytics/drilldown/ returns paginated facts and Open links for authorised staff.
- ☐ /dashboard/complaints/ shows the ICMS register for authorised staff.
- ☐ /dashboard/complaints/discipline/ shows disciplinary cases for authorised staff.
- ☐ /dashboard/complaints/decisions/ shows regulatory decisions for authorised staff.
- ☐ /dashboard/public/faqs/ loads for public users.
- ☐ /dashboard/public/forum/ loads and respects moderation/role visibility.
- ☐ /dashboard/public/map/ loads from stored mapped entities and does not geocode on page load.
- ☐ /dashboard/nhwa-workbooks/ loads for authorised NHWA users.
- ☐ Nursing Council dashboards show Welcome To Your PNG Nursing Council Online Platform Dashboard with the PNG emblem.
- ☐ Medical Board dashboards show Welcome To Your Medical Board Online Platform Dashboard with the PNG emblem.

6. Report Export Checklist

- ☐ Monthly analytics PDF generates.
- ☐ Monthly analytics Excel generates and is scrollable/readable.
- ☐ Financial forecast PDF generates.
- ☐ Financial forecast Excel generates and is scrollable/readable.
- ☐ Financial forecast Word report generates.
- ☐ Exports show office scope.
- ☐ Exports show timestamp.
- ☐ Exports show exporting user.
- ☐ Exports explain live people counts separately from imported rows.
- ☐ Exports explain manual receipts separately from spreadsheet receipts.

7. Data Readiness Checklist

- ☐ Latest ATP workbook imported into correct scope.
- ☐ Latest N-DATA workbook imported into Nursing Council scope.
- ☐ Medical Board workbook imported into Medical Board scope only.
- ☐ Future date errors reviewed.

- ☐ Duplicate registration numbers reviewed.
- ☐ Duplicate practitioner numbers reviewed.
- ☐ Duplicate Review Queue page functions tested after each import.
- ☐ Missing gender/date of birth/province/practitioner-number gaps reviewed.
- ☐ Employment records population plan confirmed.
- ☐ Institution and facility names separated and standardised.
- ☐ Government, church, private, overseas, and unknown facility/institution categories reviewed.
- ☐ Active Nursing Council analytics snapshot exists and is the only active snapshot.
- ☐ Active snapshot KPIs match the cleansed workbook totals: 34,851 lifecycle records, 19,998 ATP, 8,158 provisional, and 6,695 full licence.
- ☐ Catherine cleaned licence and cadre workbook import completed without overwriting legal registry person records.
- ☐ Receipts have been linked only where owner confidence is high.
- ☐ Unmatched, duplicate, suspicious, or high-value receipts appear in review.
- ☐ NHWA web workbooks are populated from verified data and do not push values back into the registry.
- ☐ Mapped schools, institutions, and facilities have verified coordinates before public map demonstration.

8. OpenKM-Style Repository Checklist

- ☐ Repository root folders exist.
- ☐ Nursing Council Repository is available.
- ☐ Medical Board Repository is available.
- ☐ General Registry folder is available.
- ☐ Staff can search repository documents.
- ☐ Document metadata standard is agreed.
- ☐ Current document upload pilot completed.
- ☐ Duplicate checksum detection checked.
- ☐ Document audit events reviewed.
- ☐ Current-version document approval/rejection flow tested.
- ☐ Document approval notes capture authority, meeting, SOP, or rejection reason.
- ☐ Retention policy discussed with NDOH ICT/management.

9. Training Checklist

- ☐ System Admin trained.
- ☐ Nursing Council Registrar trained.
- ☐ Medical Board Registrar trained.
- ☐ Reviewer users trained on approval request process.
- ☐ Finance Officer trained on read-only separated finance views.
- ☐ Data Quality Officer trained on missing-data and duplicate-review workflow.
- ☐ Registrars trained on notification history, inbox read/opened status, and clearing unread badges.
- ☐ Registrar users trained on Records Hub table functions and when to use workflow decisions instead of direct CRUD.

- ☐ Registrar and reviewers trained on ICMS case creation, enquiry escalation, discipline escalation, and regulatory decision recording.
- ☐ Staff trained on document approval/rejection sign-off.
- ☐ Data Quality and Finance trained on receipt-owner linking and high-value receipt review.
- ☐ Staff trained on NHWA workbook review/sign-off/export flow.
- ☐ Staff trained that Google Maps coordinates must be stored and verified locally before display.
- ☐ Public support staff trained on role/cadre dropdown choices, including CHW provisional versus full-license selection.
- ☐ Public/professional user guidance confirmed.
- ☐ OpenKM-style repository guide shared.
- ☐ Data cleansing/import alignment guide shared.

10. Go-Live Decision

Go-live should proceed only when:

- Technical checks pass.
- Access/security smoke tests pass.
- Reports generate correctly.
- Password reset works.
- Test passwords are changed.
- NDOH ICT confirms hosting/security.
- Backup/restore is confirmed.
- Staff training is completed.
- Data-quality limitations are documented for management.

System Status Report

System Status Report

Project: PNG Nursing Council and Medical Board Online Regulatory Workforce Platform

Generated: Updated 1 June 2026

Executive Summary

The platform is operational as an online workforce, registration, finance, document, reporting, and data-quality system for the National Department of Health regulatory bodies.

The current system supports separated Nursing Council and Medical Board workspaces, role-based access, board-specific registrar dashboards, Nursing Council analytics snapshots, staff inbox/chat, notification history, read/opened message status, operational access requests, financial forecast pages, monthly analytics, import tracking, duplicate review queue, missing-data review, receipt-owner linking, public-safe register search, forgotten-password support, controlled public registration role/cadre routing, Records Hub table functions, OpenKM-style document repository functions, formal ICMS complaints, discipline workflows, regulatory decision records, NHWA workbook reporting, public FAQs/forums, and mapped institution/facility references.

The platform foundation is launch-ready for controlled operational use. Production launch still requires NDOH ICT hosting/security confirmation, final staff training, test password replacement, data-cleansing sign-off, and backup/restore confirmation.

Current Live Snapshot

Checked on 1 June 2026:

Area	Count
Nursing Council analytics lifecycle records	34,851
Clean ATP records	19,998
Clean provisional records	8,158
Clean full-licence records	6,695
Estimated practitioner match groups	22,765
Data quality health score	87.0%
Registered Nurses / Midwives / Nurse Aides / Health Students in live person tables	0
Community Health Workers	11,594
Medical Doctors	327
Applications	0
Imported licence/history rows	53,178
Receipts	11,501
Receipt amount recorded	PGK 822,882.30
Missing-data review items	57,129
Pending missing-data reviews	0
Duplicate-review items	177
Pending duplicate-review items	177
Qualification records	11,863
Professional document uploads	0
Repository folders	24

Area	Count
Repository documents	0
Mapped entity references	1,462
Geocoded mapped entities	0
Public FAQ entries	5
Formal ICMS complaint cases	0
Disciplinary cases	0
Regulatory decision records	0

Current Capability Status

Capability	Status	Notes
Authentication and forgotten password	Operational	Login pages include forgotten-password flow.
Role-based access	Operational	Backend access checks separate Nursing Council, Medical Board, finance, reviewer, admin, and public users.
System Admin backend	Operational	/admin/ is restricted to System Admin.
Nursing Council dashboard	Operational	Includes live statistics, workflow tools, reports, ATP/analytics support, and data-quality links.
Medical Board dashboard	Operational	Protected Medical Board workspace.
Board-specific dashboard headers	Operational	Nursing Council and Medical Board dashboards show board-specific welcome text with PNG emblem identity.
Public registration role/cadre routing	Operational	Registration uses controlled dropdowns and separates CHW provisional from CHW full-license pathways.
Reviewer access controls	Operational	Reviewers can request operational access; access must be approved by registrar/System Admin.
Finance Officer controls	Operational	Finance Officer has read-only Workforce Flow and separated finance pages only.
Financial forecast	Operational	Nursing Council and Medical Board views are separated by office scope.
Nursing Council analytics snapshot	Operational	Active cleansed workbook snapshot drives executive KPIs, Chart.js datasets, and server-side drilldown.
Catherine workbook alignment	Operational	Cleaned provisional/full-licence and cadre workbooks are imported without overwriting legal registry identities.
Monthly/yearly analytics	Operational	Reports explain live counts, imported rows, source dates, and data-quality limitations.
Data-quality review	Operational	Missing-data workflow and Duplicate Review Queue are available with search, sort, page length, pagination, grouped source rows, and review actions.
Receipt-owner linking	Operational foundation	Matching command links high-confidence receipts and routes unmatched/suspicious receipts to review.

Capability	Status	Notes
Records Hub table functions	Operational	Nursing Professionals table includes registrar-facing table functions and CRUD actions where authorised.
Import alignment	Operational	ATP/N-DATA/Medical Board import commands and audit tools are available.
OpenKM-style repository	Integrated	Staff-facing upload, detail, metadata, version, approval/rejection sign-off, search, download audit, scoped access, checksums, and OCR linkage are implemented.
ICMS complaints	Operational foundation	Public/staff complaint intake, case list/detail, case events, attachments, risk/priority, and enquiry escalation are implemented.
Discipline workflow	Operational foundation	Disciplinary case list/detail, stage tracking, events, attachments, and complaint escalation are implemented.
Regulatory decisions	Operational foundation	Decision register captures rationale, authority/SOP reference, evidence summary, conditions, appeal rights, maker, and dates.
NHWA workbooks	Operational foundation	Toolkit is available as a standards/reporting layer populated from verified platform data.
Public FAQ/forum/map	Operational foundation	Public FAQs, moderated forums, and mapped references are available; map still needs verified coordinates.
Public register search	Operational	Returns safe public fields only.
AI Staff Assistant	Operational guidance	Available to authorised staff as guidance only.
Notification history and read status	Operational	Bell count, notification history, mailbox folders, read/opened status, and unread clearing are implemented.

Security Position

Implemented controls:

- CSRF protection.
- Django password hashing.
- Role-based access control.
- Office-scope separation.
- System Admin-only admin backend.
- Public-safe register output.
- Finance read-only restrictions.
- Reviewer operational approval workflow.
- Session timeout middleware.
- Export timestamp/user tracking for confidential reports.
- Office-scoped ICMS, discipline, and decision access checks.
- Public complaint/forum moderation boundaries.
- Document approval/rejection audit history.

Production requirements before live deployment:

- Set DEBUG=False.
- Confirm production ALLOWED_HOSTS.
- Use HTTPS.
- Confirm backup and restore.
- Confirm email backend for password reset.
- Change all testing passwords.
- Review audit logging and access policies with NDOH ICT.
- Confirm hosting environment and security monitoring.
- Confirm Google Maps API key restrictions and coordinate verification process.

Data Quality Position

The system contains substantial live registry and historical import data. However, management reporting must continue to explain:

- Live people counts are different from imported historical row counts.
- Receipt/payment rows are money records, not people.
- Analytics snapshot rows are dashboard evidence, not legal registry identities.
- Person_Group_Key is an analytics grouping key only.
- NHWA workbook values are reporting/sign-off outputs, not registry updates.
- Employment records still require population from ATP and renewal workflows.
- Legacy document uploads are not yet fully attached to historical practitioner records.
- Missing-data review and duplicate-review backlogs must be worked through before final authoritative statistics are published.

OpenKM-Style Document Management Status

Implemented:

- Repository folder structure with 24 folders.
- Office scope.
- Document metadata.
- Document versions.
- Extracted text search field.
- File checksum duplicate detection.
- Role/user access policy model.
- Document audit events.
- Document approval and rejection records.
- Repository search screen.
- Staff-facing upload, detail, metadata update, version upload, and audited download.

Operational adoption still required:

- Scan legacy paper evidence.
- Upload and tag documents.

- Link documents to applications, practitioners, receipts, and import batches.
- Link evidence to ICMS, discipline, and regulatory decision records where relevant.
- Confirm retention rules with NDOH ICT and management.

Recommended Next Actions

- Resolve pending operational access requests.
- Complete staff training using the updated user manuals.
- Run missing-data, duplicate, receipt-linking, and analytics snapshot checks before management reporting.
- Work through the 177 pending duplicate-review items before relying on final people counts.
- Continue ATP-to-employment alignment.
- Correct suspicious future dates in financial/imported records.
- Begin controlled document repository pilot with current applications, receipts, complaints, discipline files, and decision records.
- Verify map coordinates before public demonstration.
- Complete ICMS, discipline, decision-register, document-approval, NHWA, and receipt-linking UAT.
- Regenerate PDF/Word briefs and screenshots from updated Markdown before external circulation.
- Confirm production hosting, backups, and security with NDOH ICT.
- Change all test passwords before go-live.

Project Completion Report

Project Completion Report

Project: PNG Nursing Council and Medical Board Online Regulatory Workforce Platform

Date: Updated 1 June 2026

Executive Summary

The platform has reached a completed controlled-operational foundation. It supports Nursing Council and Medical Board workspaces, role-based access, practitioner records, applications, licences, receipts, board-specific dashboards, Nursing Council analytics snapshots, reports, data-quality review, receipt-owner linking, staff inbox/chat, notification history, read/opened message status, operational access requests, forgotten password, separated finance views, controlled registration role/cadre routing, Records Hub table functions, Duplicate Review Queue functions, OpenKM-style document/records management, ICMS complaints, discipline workflows, regulatory decision records, NHWA workbooks, public FAQs/forums, and mapped institution/facility references.

The remaining work is not a major feature gap. The remaining work is operational: staff training, data cleansing, legacy document attachment, NDOH ICT hosting/security sign-off, password reset, backup confirmation, and disciplined reporting.

Completed Platform Scope

Area	Completion status
Authentication and forgotten password	Completed
Role-based access	Completed
Nursing Council / Medical Board separation	Completed
System Admin-only admin backend	Completed
Nursing Council registrar dashboard	Completed
Medical Board dashboard	Completed
Reviewer operational approval workflow	Completed
Finance Officer read-only restrictions	Completed
Separated Nursing Council and Medical Board financial forecast	Completed
Monthly/yearly analytics reporting	Completed
Nursing Council active analytics snapshot and drilldowns	Completed
Catherine cleaned licence/cadre workbook alignment	Completed
Data-quality and duplicate-review tools	Completed
Receipt-owner matching and high-value review routing	Completed foundation
Duplicate Review Queue table functions	Completed
Nursing Professionals Records Hub table and CRUD functions	Completed
Public registration Role/Cadre dropdown, including CHW provisional/full-license distinction	Completed
Notification history, unread badge clearing, and message read/opened status	Completed
Board-specific dashboard headers with PNG emblem	Completed
Import alignment commands and guidance	Completed
Staff inbox, chat, enquiries, notifications	Completed
AI Staff Assistant	Completed guidance tool
Public-safe Nursing Council register search	Completed

Area	Completion status
OpenKM-style repository and records management	Integrated
Document approval/rejection sign-off	Completed
Formal ICMS complaints module	Completed foundation
Disciplinary case workflow	Completed foundation
Regulatory decision register	Completed foundation
NHWA workbook reporting layer	Completed foundation
Public FAQ, moderated forum, and mapped reference pages	Completed foundation
Documentation index, user guide, data cleansing guide, OpenKM guide, timeline	Completed

Current Live Snapshot

Checked on 1 June 2026:

Area	Count
Nursing Council analytics lifecycle records	34,851
Clean ATP records	19,998
Clean provisional records	8,158
Clean full-licence records	6,695
Data quality health score	87.0%
Registered Nurses / Midwives / Nurse Aides / Health Students in live person tables	0
Community Health Workers	11,594
Medical Doctors	327
Applications	0
Imported licence/history rows	53,178
Receipts	11,501
Receipt amount recorded	PGK 822,882.30
Missing-data review items	57,129
Duplicate-review items	177
Pending duplicate-review items	177
Qualification records	11,863
Repository folders	24
Repository documents	0
Mapped entity references	1,462
Geocoded mapped entities	0
Formal ICMS complaint cases	0
Disciplinary cases	0
Regulatory decision records	0

OpenKM-Style Completion

The OpenKM-style scope is integrated into the platform as:

- Document repository folder structure.
- Office-scoped document separation.
- Document metadata.
- Document versions.
- OCR/extracted-text search field.
- SHA-256 checksum duplicate detection.
- Role/user access policies.
- Document audit events.
- Document approval/rejection sign-off records.
- Repository search.
- Staff-facing upload, detail, metadata update, version upload, and audited download.
- Links to application, data-quality, import, and reporting workflows.

This provides the foundation for structured paper-to-electronic record handling.

Key Governance Rules

- Nursing Council and Medical Board data must remain separated.
- Finance reports must be viewed by office scope.
- Reviewers need registrar/System Admin approval before higher-risk tools are unlocked.
- Public register outputs must show only safe public fields.
- Reports must separate live people counts from imported historical rows.
- Reports must identify whether a figure comes from legal registry tables, analytics snapshots, workbook imports, NHWA workbooks, or receipt ledgers.
- Person_Group_Key is an analytics grouping key only, not a legal practitioner identity.
- Receipt/payment rows must be reported as financial transactions, not practitioner counts.
- Receipts must be linked only when owner evidence is strong; unmatched or suspicious receipts must be reviewed.
- Complaints, discipline, and regulatory decisions must be tracked through ICMS/discipline/decision modules with evidence and audit history.
- Legacy paper evidence must be scanned, uploaded, tagged, and linked before it can support audit-quality decisions.

Known Operational Risks

Risk	Management action
Missing legacy data	Continue missing-data review and source-file correction.
Duplicate practitioner records	Continue duplicate review using registration number, practitioner number, name, DOB, institution, and source row.
Generated presentation/brief files may contain older screenshots or counts	Regenerate generated PDF and Word outputs from the updated Markdown source before external circulation.
Employment records incomplete	Use renewal and ATP workflows to populate employment status, facility, sector, and province.
Legacy paper evidence not attached	Begin OpenKM-style repository upload pilot and link evidence to records.
Public map has no verified coordinates yet	Verify mapped schools, institutions, and facilities before public demonstration.

Risk	Management action
ICMS/discipline SOPs still need operational adoption	Train staff and approve SOPs for complaint triage, discipline escalation, decision recording, and closure.
NHWA sign-off ownership still needs assignment	Assign NHWA reviewers and require checklist completion before export.
Unmatched receipts can weaken finance traceability	Run receipt linking and review unmatched/high-value receipts regularly.
Staff role misuse	Train users and keep operational access approvals controlled.
Production hosting/security	Obtain NDOH ICT sign-off before public deployment.

Final Conclusion

The platform is functionally ready as a controlled online workforce and regulatory system. It can support registration workflows, finance transparency, document governance, reporting, data-quality management, and separated regulatory body operations.

The next success factor is disciplined use: clean source data, attach evidence, enforce role access, train staff, and report figures with clear source explanations.
