

PAPUA NEW GUINEA NATIONAL DEPARTMENT OF HEALTH

The National Department Of Health Regulatory Bodies Nursing Council & The Medical Board Online Workforce System

Presentation Pack For Management, Staff Training, ICT Review, And Launch Readiness

Generated: 07 May 2026, 08:40 AM

1. Executive Overview In Plain Language

The platform is a government regulatory operations system. It manages applications, practitioner records, licences, qualifications, documents, receipts, imports, data-quality issues, dashboards, reports, and staff workflows for the Nursing Council and Medical Board.

Core rule: imported rows are not automatically trusted. They are staged, validated, cleansed, reviewed, approved, then promoted into live registry records.

Statistic	Current total	Meaning
Registered Nurses	13,493	Live person records in the Nursing Council nurse table.
Midwives	2,112	Live person records in the Nursing Council midwife table.
Nurse Aides	800	Live person records in the Nursing Council nurse aide table.
Graduands / Health Students	7,624	Live pipeline records for graduands and health students.
Community Health Workers	11,562	Medical Board / CHW scope records currently loaded.
Medical Doctors	0	Medical Board doctor records currently loaded.
Applications	13,843	All application records currently stored.
Receipts	11,340	Manual receipt records. Total amount: PGK 811284.30.
Imported Licence / History Rows	96,806	Operational and historical spreadsheet rows; one person can have multiple rows.
Qualifications	25,376	Qualification records currently stored.
Missing Data Review Items	98,055	Open data-quality items that staff still need to review.
Duplicate Review Items	487	Open possible duplicate records requiring staff review.

2. Department-Wide Diagrams

Enterprise Architecture

Regulatory Workflow

Regulatory Workflow

No silent approvals: every official decision needs evidence, status history, and audit trail.

Data Governance Flow

Data Governance Flow

Imported rows are not automatically trusted. They are staged, validated, cleansed, reviewed, approved, then promoted.

Plain explanation: old spreadsheets and paper files can contain spelling differences, missing dates, duplicate people, wrong provinces, and future dates. The platform makes those issues visible before figures are used for management decisions.

Role Access And Privacy

Role Access and Privacy Model

Each user group sees only the work and records needed for its role.

Privacy rule: Nursing Council and Medical Board data must remain separated through backend permissions, not only hidden buttons.

3. Data Quality, Repository, Finance, And AI Readiness

Area	Current position
Recognised PNG nursing schools	20
Government / Non-government schools	9 government, 10 non-government
Open missing-data review items	98055
Open duplicate review items	487
Repository folders / documents / versions	24 / 0 / 0
Nursing Council finance combined total	PGK 1420842.20
AI Assistant mode	Local Offline Assistant - Using rule-based, offline staff guidance and cleansing checks.

4. Current System Interfaces

Government Launch Data Rule

Imported rows are not automatically trusted. They are staged, validated, cleansed, reviewed, approved, then promoted into live registry records.

Current scope: All Regulatory Offices. Staff should correct issues from source records, not from memory.

📅

Date Issues Requiring Source Verification

Issue	Count	Why It Matters	Sample Records
Future import issued dates	2	The issued date is later than today and can distort licence activity trends.	Nerolyn Mathew PG 2361 2026-11-21 FULL REGO 17, 18, 19 & 20, row 2622 Nerolyn Mathew PG 2361 2026-11-21 FULL REGO 17, 18, 19 & 20, row 2622
Future import payment dates	111	The payment date is later than today and can distort financial forecast totals.	Orpha Tugo 5820 2026-10-16 April 2026, row 157 Lewis Eno GD 5894 2026-11-19 Feb -Mar 2026, row 35 Ruth Mageva FULL PG 2027-01-01 Midwifery list, row 394 Gunane Kwuane FULL PG 2027-01-01 Midwifery list, row 414 Gunane Kwuane FULL PG 2027-01-01 Midwifery list, row 414

📋

Launch Action Plan

1. Fix future receipt/payment dates first because they affect finance and reports.

2. Review old dates before 2000 against original source files.

3. Clear high-severity missing-data reviews before publishing official statistics.

4. Use Duplicate Reviews for same person / same identifier issues.

5. Re-run production data preparation after each major import.

My Profile

Financial Forecast and Receipt Tracking

This page separates Nursing Council receipts from Medical Board receipts and combines live receipt entries with spreadsheet-imported payment rows for financial tracking.

Current scope: Nursing Council. Prepared by: finance_officer on 07 May 2026 08:40. Use the export buttons below to generate full detailed finance reports in Excel, PDF, and Word.

SEPARATE FINANCE VIEWS

Nursing Council Financial Forecast

Medical Board Financial Forecast

Finance Officer read-only access:

this account can view Workforce Flow and the selected office's Financial Forecast only. CRUD, imports, approvals, receipt editing, and operational command tools remain locked unless approved by the Registrar and System Admin.

Finance Report Exports

How to use this page:

first confirm the office scope, then review manual receipts, spreadsheet-imported receipts, monthly and yearly totals, and finally export the finance report in the format needed for management or audit review.

Export Excel Finance Report

My Profile

The National Department Of Health Regulatory Bodies

Nursing Council & The Medical Board Online Workforce System

AI Registrar Assistant

This assistant is reserved for admin and registrar roles only. It is designed to help staff align imported data, filter incomplete applicant files, answer staff questions, and generate reports and office briefs. Applicants continue to use the separate public applicant assistant only.

Current scope:

Nursing Council. The assistant reads the same live registry, import, review, and application queues already used by staff across the platform.

AI mode:

Local Offline Assistant. Using rule-based, offline staff guidance and cleansing checks. This mode works without internet access or external API billing. Configure Ollama to enable a free local GPT model.

Pending Applications

Staff AI Chat

AI Registrar Assistant

You can ask about pending applications, missing data, imports, reports, role access, documents, or what action to take next.

How to Use It

1. Open the AI assistant before or after an import to see the latest data-quality and screening signals.

2. Use the screening queue first. Every pending application should be checked for a linked practitioner record, receipt, supporting documents, and any missing-data review.

3. Run the missing-data audit after imports or bulk updates so the queue reflects the latest state of the registry.

Registration Guidelines

GENERAL-01
Use the Correct Form Code

Open

Select the exact PNGNCRF form code before submitting so your application follows the right review pathway.

REQUIRED FIELDS

- Correct applicant pathway
- Matching form code
- Supporting documents
- Signature or declaration

GENERAL-02
Keep Receipt and Supporting Documents Ready

View Guide

Upload payment evidence, passport or ID documents, qualifications, and employer references where required.

REQUIRED FIELDS

- Official receipt number
- Receipt image
- ID or passport
- Certificates or references

PROFILE
Keep Your Record Current

Open

Ensure your personal details, registration details, and payment records stay current in the registry.

REQUIRED FIELDS

- Professional information
